Summary

Motivated B.Tech Cyber Security student with strong interest in network security, cloud technologies, and ethical hacking. Skilled in Python programming, computer networking, and cybersecurity tools. Experienced in developing web-based projects and applying security concepts to practical scenarios. Seeking opportunities to expand knowledge in cybersecurity, cloud networking, and system security.

Technical Skills

Programming: Python, C++, HTML, CSS, JavaScript
Networking: Computer Networking, Wireless Networking, Cloud Networking Concepts
Cloud Computing: Cloud Computing Fundamentals
Cybersecurity Tools: Wireshark, Nmap, Hydra, Nessus, CyberChef
Networking Tools: Cisco Packet Tracer
Technologies: Containerization, Virtualization
Core Computer Science: Operating Systems, Data Structures & Algorithms, Analysis of Algorithms, RDBMS

Projects

Secure Login Page

- Developed a secure login system implementing authentication mechanisms.
- Implemented input validation to improve login security.
- Focused on protecting user credentials and preventing unauthorized access.

Eco-Friendly Diwali Website

- Created a website promoting eco-friendly Diwali celebrations.
- Provided suggestions on recycling old materials and reducing pollution.
- Encouraged sustainable celebration practices through awareness content.

Education

Bachelor of Technology (B.Tech) Cyber Security And Forensics Science
CT University
Expected Graduation: 2028

Certifications

Cyber Security Analyst
IBM Cloud Fundamentals
Python for Data Science
